PROFESSIONAL PROFILE

Detail-oriented, CompTIA Tech+ certified IT undergraduate specializing in Cybersecurity, with coursework in Windows Server, Active Directory, Linux, and networking (CCNA). As a Business Analyst Intern at Gardenia Bakeries Philippines, carried a quality document control process from requirements gathering to a working workflow in the company's document management system, and tested production-bound releases. Seeking an entry-level role in systems administration or business analysis.

EXPERIENCE

Business Analyst Intern | Gardenia Bakeries (Philippines), Inc. Apr 2026 – Jul 2026
MIS Department, Biñan, Laguna | IT199F practicum, 486 hours

- Digitized the Document Control Form (QMS-FORM-1.1) process in the IComTeq IMS document management system, from requirements gathering with the document control team to a working build in the development workspace.
- Consolidated six documented procedures into one As-Is model, and designed the To-Be for three process pools in draw.io at overview and detailed levels.
- Built and tested an 11-step approval workflow and a copy-request workflow with an 18-tag tag set and fail-safe approval gates; wrote the Functional Specifications Document and handed over the project.
- Ran 1,184 end-to-end test cases for a customer's sales conversion, covering test data, invoice validation, and Oracle interfacing, and 235 test cases per cycle for the field sales tablet apps on Android 16.
- Supported an AppSheet access-request app across business analysis, testing, and development: tracked the requestor's changing requirements, tested its multi-stage approval flow, and built fields with conditional logic.
- Mapped the customer and product fields of the legacy Sales System and SFA for the company's migration to Oracle.

Subtitle Proofreader | Part-time, remote Nov 2025 – Present

- Proofread English subtitles translated from Japanese, improving the wording and fixing spelling, grammar, and punctuation so each line reads as natural American English.
- Built subproof, a Python tool that runs an LLM first pass over subtitle files (.ass, .srt, .vtt) through OpenRouter and logs every change for my review.
- Protected each file's formatting by masking typesetting tags behind placeholders and validating every batch, keeping the original lines whenever a batch fails.

EDUCATION

Mapúa Malayan Colleges Laguna | Cabuyao, Laguna | *Bachelor of Science in Information Technology (Specializing in Cybersecurity)* | Expected: 2027

- **Relevant Coursework:** Data Structures & Algorithms, Windows Active Directory & Server, CCNA, Systems Analysis & Design, Full-Stack Web Development, Project Management, Ethical Hacking, Operating Systems
- **Honors:** Dean's Lister (A.Y. 2022–2025), Scholarship (one semester, 2022)
- **Organization:** Member, Junior Information Systems Security Association (JISSA)

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, JavaScript, TypeScript, Kotlin, PHP, C++, C#, HTML/CSS, SQL
- **Frameworks/Tools:** React, React Native, Next.js, Node.js, Supabase, Bootstrap, Git/GitHub
- **Databases:** MySQL, PostgreSQL, Microsoft SQL Server
- **Business Analysis & QA:** Process modeling (draw.io), FSD writing, test case design, Jira, IComTeq IMS, Google

AppSheet
- **Operating Systems:** Windows, Linux (Kali, Pop!_OS)
- **Networking & Virtualization:** LAN/WAN · VLANs · ACLs · VirtualBox · Cisco Packet Tracer
- **Languages:** English (TOEIC Listening & Reading 890; Speaking 170, Writing 200), Filipino

TECHNICAL PROJECTS

A Community-Based Reporting and Response System with Geotagging Integration for CDRRMOs | Researcher & Developer

- Developed a cross-platform disaster reporting system (Next.js, React Native, Supabase) connecting citizens, CDRRMO operators, and field responders across web and mobile.
- Built a role-based admin portal with MFA-secured operator login, a pending verifications dashboard, and real-time incident management using Supabase Auth and Row-Level Security.
- Implemented citizen identity verification workflows, including government ID upload, secure image review via signed URLs, and approve/reject actions with full audit logging.
- Collaborated with the Biñan City CDRRMO to gather requirements, align features with real operational workflows, and design a system compliant with the Data Privacy Act of 2012.

Fish Tacos!: Multi-Layer Cryptographic Model Research | Researcher & Programmer

- Developed a custom cryptographic tool combining the Blowfish, Salsa20, and AES algorithms in Python.
- Tested and benchmarked the algorithm to evaluate its security strength against standard benchmarks.

IoT: NCAP Traffic Light System | Programmer

- Proposed and engineered an NCAP traffic light solution using an Arduino UNO and a WeMos D1 (ESP8266) to interface with ultrasonic sensors.
- Developed an Android app in Android Studio and a web interface, backed by XAMPP and MySQL, to control and monitor the system and its recorded violations.

Production MIS for Showa Advance Manufacturing Corporation | Team Member

- Analyzed and designed a production management information system for a real manufacturing client with a team of four, from client interviews to a Figma prototype.
- Kept the project schedule (work breakdown structure and Gantt chart) and the meeting minutes, and contributed to the data flow diagrams, HIPO and IPO charts, and system documentation.

CERTIFICATIONS

- **Job Ready: Employability Skills (Basic)** – Wadhwani Foundation, 2026
- **Full Stack Web Development** – Amazon, 2026
- **Foundations of Project Management** – Google, 2026
- **Google Cloud Computing Foundations** – Google, 2025
- **CompTIA Tech+** – CompTIA, 2025
- **Ethical Hacker (Badge)** – Cisco, 2025

SEMINARS

- **Global AI Manila AgentCamp** – Developed and deployed AI-powered agents on Microsoft Azure.
- **Cloud Foundations: From Core Concepts to Career Certification** – Cloud and firewall fundamentals.
- **IoT Unplugged: From Devices to Data Intelligence (Webinar)** – IoT, from the basics to its future use.
- **Data Privacy and Protection in the Digital Era (Webinar)** – Data privacy law and data protection practice.
